To whom it may concern,

Thank you for taking the time to review my qualifications. I have been a practicing environmental and civil engineer in the consulting industry since 1998. I hold active professional engineering licenses in New York and Florida. I returned to New York State in 2006 after an eight years working in the southeast region.

Although I am a native of Syracuse New York, I received my bachelor's and master's degrees in environmental engineering (BS EnvE, MS EnvE) from the University of Central Florida. This course of study is an American Board of Engineering Technology (ABET) accredited program. My career has been extremely varied and well rounded by extensive training and continuing education.

I have worked for both large and small engineering firms including Parsons Engineering Science, CH2MHill and Arcadis. An extensive work history listing project summaries can be provided upon request. I have been directly responsible for all phases of federal, state and local environmental and civil engineering permitting and regulatory oversight for various projects. These duties included:

- Extensive stormwater management design experience and SWPPP development and obtaining coverage under the SPDES GP-0-10-001 and recent GP-0-015-002 update.
- Authored an analysis of a NYCDEC Channel Stabilization Phosphorus Loading calculation method and provided an alternative method that was approved by the NYSDEC (provided upon request).
- Presented this alternative method analysis at the Lower Hudson Coalition of Conservation Districts (LHCCD) 2016 fall meeting.
- In-depth knowledge of NYSDEC SWMDM 2010 and the 2015 manual update.
- Expert in stormwater and flood analysis using HydroCAD and HECRAS software.
- Ongoing professional training in Erosion and Sediment Control techniques and industry products.
- Extensive knowledge with the NYS SEQR process and EAF development.
- Permit development and regulatory interaction with the NYSDEC, NYCDEP, USACOE, EPA, and FDEP.
- Create project proposal submittals (RFP development and response).
- Project cost estimation, financial oversight and monthly status reporting.
- Extensive health and safety training.
- Manage civil land development projects.
- Subcontractor oversight.
- Technical report writing and figure development, production and submittals.
- Presentations for the general public and private clients.
- Staff management and mentoring.
- Water/Wastewater treatment facility sampling and permitting.
- Analytical laboratory oversight and data analysis.

Extensive training in project and staff management has been ongoing throughout my career. Human resources philosophy and implementation were included in various corporate training programs. This knowledge base was enhanced by technical training including initial 40 hour OSHA training, the 10 hour construction safety course, confined space entry, first aid, hazardous waste management training, health and safety courses in construction, green technology training, etc.

For your convenience, I have attached a brief resume with this letter for your review and can provide an extensive work history if required. I would be very interested in speaking with you further about a position with your firm.

Sincerely,

John H. Belyea, PE

Introduction:

The purpose of this resume is to obtain an engineering position in New York State. I am a professional engineer with a master's degree in environmental engineering. Since 1998, I have supported a number of established engineering firms over a wide variety of projects in New York, Florida and Georgia. Those firms include:

- Parsons Engineering Science- Atlanta, Georgia, 1998-1999.
- CH2MHill- Jacksonville, Florida, 2000-2003.
- Applied Technology and Management- Jacksonville Beach, Florida 2003-2004.
- Miller, Sellen, Conner & Walsh- Stuart, Florida, 2004-2005.
- Arcadis- Port St. Lucie, Florida, 2005-2006.
- Bohler Engineer- Albany, New York, 2006.
- Buckman & Whitbeck Engineering & Surveying- East Berne, New York, 2006-2008.
- Larson Design Group-Corning, New York, 2010-2011.
- Rennia Engineering Design, PLLC, 2011-2015
- East of Hudson Watershed Corporation 2015-2017.

References are available upon request. Please feel free to contact me by phone or email for more detailed information including an extensive project list.

Qualifications:

Project experience in:

- Water Resource design and project management.
- Manage various projects from inception through final approvals.
- Interaction with all governmental agencies including monthly project presentations throughout the approval process.
- Environmental Characterization and Delineation
- Regulatory Compliance
- Land Development
- Various Engineering Modeling Experience
- Extensive corporate project management and client service management techniques and interpersonal training.
- Manage and mentor junior employees.

Degrees and Licenses:

1997 - Bachelor of Science in Environmental Engineering, University of Central Florida, Orlando Florida

1998 - Master of Science in Environmental Engineering, University of Central Florida, Orlando Florida

2003 - Professional Engineering License, State of Florida, License #59260 (Active)

2007 - Professional Engineering License, State of New York, License #84442 (Active)
