OBJECTIVE

A challenging internship in the field of Civil Engineering and Architecture that will propel me in preparing for a professional career.

PERSONAL STATEMENT

I am a junior in college and an internship is the right fit for me at this point in my life because it allows for introduction into the professional engineering world in an educational environment. I long for challenging assignments and different experiences, which come with an opportunity to develop my career and talents while adding value to your organization. I am eager to see myself exile at the engineering field after graduation and I believe from early preparation would get me there.

EXPERIENCE

JANUARY 2018 – FEBRUARY 2018

INTERN, FRANKI AFRICA

On field observation to gain experience on pile foundation construction and the on field management skills.
