EDUCATION
BS - Civil Engineering, Kabul University   **2004**

EXPERIENCE
Asif Khan Road and Building Construction CO, Civil Engineer   **Mar 2016 – Jul 2017**
- Analyzed survey reports, maps, drawings, blueprints and other topographical to plan projects.
- Estimated quantities, cost of materials, equipments, and labor to determine project feasibility.
- Prepared civil engineering drawings, technical specifications according to contract documents.
- Prepared invoices for payment as per project schedule.
- Reviewed and approved shop drawings, Materials according to approved contract submittal.
- Daily inspection of construction activities such as earth works, road construction and plumbing, based on QA/QC manual.

Macro Vantage Levant (MVL),
Quality Control Civil Engineer (USACE Project)   **Sep 2014 - Feb 2016**
- Applied specifications, reference codes and standards.
- Conducted three phase of control preparatory, Initial and follow up.
- Reviewed provisions that have been made to provide required inspection and testing.
- Performed daily checks to control activities, including testing and compliance.
- Efficient management of project Documents.
- Ensured all materials and equipments have been tested, submitted and approved.
- Communicated and documented deficiencies.
- Ensured the quality of materials and workmanship by testing and inspection.
- Ensured project is completed to a satisfactory standard.
- Conducted final inspections, punch-outs, pre-final and final acceptance.

Lakeshore Toltest Corporation (LTC)
Quality Control Inspector (USACE Projects)   **May 2011 - Feb 2014**
- Read construction documents to determine project details and specification.
- Verification of compliance with plans, specifications, ASTM, ACI, IBC and other codes.
- Evaluation of concrete construction in the field with all related testing according ASTM.
- Documentation and reporting of inspection results.
- Ensured repairs or alterations are performed correctly and using approved materials.
- Performed maintenance of equipment, calibration and adjustments as needed.
- Conducted final inspections, punch-outs, pre-final and final acceptance.

Technologists Inc. (TI) QC Manager (USACE Projects)   **Jan 2010 - Apr 2011**

- Implemented on site QA/QC management system.
- Maintained activities files, daily reports, submittals, RFI, change of orders, 3phase inspections.
- Reviewed with inspectors testing results of soil, concrete, grout and other materials.
- Reviewed contract drawings, specifications, reference codes and standard.
- Verified site activities are in accordance with the applicable codes and standards.
- Ensured QC documentations are completed as-built.
- Attended project meetings and recorded meeting minutes.
- Ensured nonconformance reports addressed properly.
- Ensured sites meet health and safety requirements.

Swedish Committee for Afghanistan, Site Engineer   **May 2005 – Jun 2009**

- Daily inspection of construction activities such as earth works, road construction, plumbing, and electrical based on QA/QC manual.
- Checked and Ensured the accuracy of steel fixing, shuttering and steel bending before concrete pouring.
- Curried out all construction works within technical engineering standards and according to technical design.
- Monitoring and evaluation of project according to technical proposals.
- Estimated quantities, cost of materials, equipments, and labor to determine project feasibility.
- Managed all construction activities.
- Prepared daily progress report and work plan.

CERTIFICATIONS

- Construction Quality Management (CQM) Training Course by USACE
- Construction Quality Assurance Training course by USACE
- Quality Control System (QCS) Training Course by USACE

SKILLS:

- PDF PRO
- MS office suite
- AutoCAD
- Quality Control System (QCS)

ACHIEVMENTS/HONORS:

- USACE Certificate of Appreciation
- LTC Certificate of Appreciation
- MVL Certificate of Appreciation
- SCA Certificate of Appreciation
